*Abstract.* This research aims to determine how the relationship between young people and to know what are the factors that trigger conflict and to know what is being done to resolve the conflict youth that occurred between them. The method used in this study is a qualitative case study approach.

The result of this research is the relation among the youth doesn't run well because of the attitudes that disobey the norm of culture and law. In daily interaction often leads to clashes and misunderstandings that will affect the conflict. Many of the factors that contributed to the conflict. The emotions of young people who are still unstable causing them easy to do perversity. Drinking, as well as educational and economic factors are weak regarded as a major trigger of the dispute. In addition, factors and alignments tribal officials also trigger the onset of an existing dispute. To resolve disputes that affect the conflict is expected to youth to be able to control his emotions, and to make them closer to god and increase the potential that exists within him. To the government and relevant parties, including the security forces, expected to be able to be firm, impartial and fast enough to overcome the conflict is expected to be the best solution to maintain the stability of people's lives they lead. The presence of traditional leaders who have a higher position than a government, should be able to provide a solution when there are problems related to ethnicity. Parents are expected to be able to supervise, provide a good example in everyday life and seeks to understand the part of growth and development experienced by young people. This research is hoped can improve of PKn's materials of the character education curriculum for the 1st grade of SMA/MA, especially in Basic Competence of the similarity of citizen's right without differentiating of religion, gender, culture and ethnic.
