Tujuan Penelitian ini adalah untuk menganalisis partisipasi anggota kelompok tani dalam IPDMIP dan faktor-faktor yang berhubungan dengan partisipasi anggota kelompok tani dalam IPDMIP di Kecamatan Kalirejo Kabupaten Lampung Tengah. Penelitian ini menggunakan metode sensus dengan responden pada penelitian ini berjumlah 25 petani. Penentuan lokasi penelitian ini dilakukan secara *purposive* (sengaja) dengan pertimbangan bahwa di Kecamatan Kalirejo merupakan salah satu kecamatan yang mendapatkan Integrated Partisipatory Development and Management of Irrigation Program (IPDMIP), selain itu kelompok tani di Kecamatan Kalirejo juga aktif sehingga mendapatkan penghargaan kelompok tani unggul di IPDMIP. Waktu penelitian dilaksanakan pada bulan November 2021. Metode analisis data menggunakan analisis deskriptif kuantitatif, tabulasi, dan korelasi *Rank Spearman*. Hasil penelitian tingkat partisipasi anggota kelompok tani dalam IPDMIP di Kecamatan Kalirejo Kabupaten Lampung Tengah pada tahap perencanaan termasuk dalam kategori sangat berpartisipasi. Partisipasi petani pada tahap pelaksanaan dan pemanfaatan hasil pada penelitian ini termasuk dalam kategori berpartisipasi. Partisipasi petani pada tahap evaluasi termasuk dalam kategori kurang berpartisipasi. Motivasi petani, peran penyuluh pertanian, kepemimpinan ketua kelompok tani berhubungan dengan tingkat partisipasi anggota kelompok tani dalam IPDMIP di Kecamatan Kalirejo Kabupaten Lampung Tengah.

*The purpose of this study is to analyze: the participation of farmer group members and the factors related to the participation of farmer group members in IPDMIP in Kalirejo District, Central Lampung Regency. This study uses a survey method with the respondents amounted to 25 farmers. The determination of the location of this research was carried out purposively (deliberately) with the consideration that Kalirejo Sub-district is one of the sub-districts that received the Integrated Participatory Development and Management of Irrigation Program (IPDMIP). Besides, farmer groups in Kalirejo District are also active so that they received an award as the superior farmer group, in the IPDMIP. The research was carried out in November 2021. The data analysis method uses quantitative descriptive analysis, tabulation, and Spearman Rank correlation. Research results showed that the level of participation of farmer group members in IPDMIP in Kalirejo District, Central Lampung Regency at the planning stage is included in the very participating category. The participation of farmers at the implementation stage and the utilization of the results in this study are included in the participating category. The participation of farmers at the evaluation stage is included in the category of less participation. The motivation of farmers, the role of agricultural extension workers, and the leadership of the farmer group leaders are related to the level of participation of farmer group members in IPDMIP Kalirejo District, Central Lampung Regency.*
