This research was conducted with the aim of testing the effect of balancing funds, operating expenditures, and capital expenditures on the efficiency of local government financial performance. The population in this study are districts/cities in Indonesia. The number of research samples is 165 samples obtained using multistage sampling methods. The data source is obtained from the financial reports of district/city governments in Indonesia in 2019. The data analysis method used is multiple linear regression analysis with the SPSS 26 software application. Based on the results of multiple linear regression tests, the first hypothesis states that balancing funds have a negative effect on the efficiency of financial performance. The second hypothesis of operating expenditure does not affect the efficiency of local government financial performance, the third hypothesis of capital expenditure has a negative effect on the efficiency of local government financial performance.

Keywords: **Balancing Fund, Operational Expenditure, Capital Expenditure, and Regional Government Financial Performance Efficiency.**
