*This study aims to determine the analysis of differences in rubber production, rubber exports and the number of workers in rubber companies in Lampung Province before and during the spread of coronavirus disease (covid-19). This study uses secondary data and uses quantitative descriptive analysis methods and the Wilcoxon Difference Test to determine the impact of the corona virus disease (covid19). The results of this study indicate that the coronavirus disease (covid-19) has no impact on rubber production, so there is no significant difference to changes in production before and before the spread of coronavirus disease (Covid-19). Meanwhile, on rubber exports he corona virus disease (covid-19) has a positive impact and for the workers, is a negative impact. This means changes in exports and the number of workers before and before the spread of the coronavirus disease (Covid-19).*

Penelitian ini bertujuan untuk menganalisis perbedaan produksi karet, ekspor karet dan jumlah tenaga kerja pada perusahaan karet di Provinsi Lampung sebelum dan saat penyebaran *coronavirus disease (covid-19)*. Penelitian ini menggunakan data sekunder dan menggunakan metode analisis deskriptif kuantitatif serta Uji Beda Wilcoxon untuk mengetahui dampak *coronavirus disease (covid19)*. Hasil dari penelitian ini menunjukkan bahwa *coronavirus disease (covid-19)* tidak memiliki dampak terhadap produksi karet, sehingga tidak terdapat perbedaan yang signifikan terhadap perubahan produksi sebelum dan saat penyebaran *coronavirus disease (Covid-19)*. Pada Ekspor Berdampak Positif dan pada tenaga kerja *coronavirus disease (covid-19)* berdampak negatif. Akibat *coronavirus disease (Covid-19)* terhadap perubahan ekspor dimana Ekspor Karet akibat Covid Meningkat dan jumlah tenaga kerja Menurun Pada saat sebelum dan saat penyebaran *coronavirus disease (Covid-19)*.
