The problem of this research stemmed from the Covid-19 pandemic outbreak which did not allow face-to-face learning directly. The purpose of this study was to examine and also describe the use of learning media based on communication media for elementary school teachers in the southern Budi Utomo Metro cluster. This research method is qualitative research. Data was collected through interviews, observation and documentation. Sources of research data are teachers, principals and school operators in the Budi Utomo Metro Selatan cluster. The main focus of the research is the use of learning media during the Covid 19 pandemic for elementary school teachers in the Budi Utomo Metro Selatan cluster. The results obtained that the teacher preparation process using online learning in the Budi Utomo South Metro cluster has been carried out quite well. Learning media created by the teacher whatsapp group, google classroom, google form, zoom, learning videos and also power points. The inhibiting factors in online learning in the Budi Utomo Metro Selatan cluster are, there are some students who do not have a Handphone or are still with their parents, then the mobile memory capacity is inadequate, the internet network is less stable, the internet quota is limited, the teacher's lack of competence in using online learning media and parents who lack an understanding of learning materials.
