### **KINERJA PENYULUH PERTANIAN LAPANGAN DAN PRODUKTIVITAS USAHATANI PADI SAWAH DI KABUPATEN LAMPUNG TIMUR**

**Oleh**

**Serla Aulia Firnanda**

Penelitian ini bertujuan untuk mengetahui: Kinerja penyuluh pertanian lapangan, faktor-faktor apa saja yang berhubungan dengan kinerja penyuluh pertanian dan, hubungan kinerja penyuluh pertanian dengan produktivitas usahatani padi di Kabupaten Lampung Timur. Penelitian ini dilakukan di Kecamatan Purbolinggo dan Pekalongan, Kabupaten Lampung Timur pada bulan Agustus-September 2022. Responden pada penelitian ini terdiri dari 12 orang penyuluh pertanian dan 76 petani. Pengujian data menggunakan deskriptif kuantitatif dan Korelasi *Rank Spearman*. Hasil penelitian menunjukkan kinerja penyuluh pertanian di Kabupaten Lampung Timur dalam hal persiapan penyuluhan pertanian tergolong baik, pelaksanaan penyuluhan pertanian tergolong cukup baik, dan evaluasi penyuluhan pertanian tergolong baik. Secara keseluruhan kinerja penyuluh pertanian di Kabupaten Lampung Timur tergolong cukup baik. Faktor-faktor yang berhubungan dengan kinerja penyuluh pertanian adalah metode dan teknik, ketersediaan sarana dan prasarana, dan tingkat motivasi penyuluh pertanian, sedangkan tingkat pendidikan dan jumlah petani binaan tidak memiliki hubungan yang nyata. Terdapat hubungan yang nyata antara kinerja penyuluh pertanian dengan peningkatan produktivitas usahatani padi.

Kata kunci: Kinerja, penyuluh pertanian, faktor-faktor, produktivitas

## **ABSTRACT**

### ***Performance Of Field Agricultural Extension Workers and the Productivity Of Lowland Rice Farming In East Lampung***

**By**

**Serla Aulia Firnanda**

*This study aims to determine: the performance of agricultural extension workers, factors related to the performance of agricultural extension workers, and the relationship between the performance of agricultural extension workers and the productivity of rice farming in East Lampung Regency. This research was conducted in Purbolinggo and Pekalongan Districts, East Lampung Regency in August-September 2022. Respondents in this study consisted of 12 agricultural extension workers and 76 farmers. Data were tested using quantitative descriptive analysis and Spearman Rank Correlation. The results showed that the performance of agricultural extension workers in East Lampung Regency in terms of preparation for agricultural extension was good, the implementation of agricultural extension was quite good, and the evaluation of agricultural extension was quite good. Overall, the performance of agricultural extension workers in East Lampung Regency is quite good. Factors related to the performance of agricultural instructors are methods and techniques, availability of facilities and infrastructure, and the level of motivation of agricultural extension workers, while the level of education and the number of assisted farmers have no significant relationship. There is a significant relationship between the performance of agricultural extension workers and productivity of rice farming.*

*Key words: Performance, agricultural extension, factors, productivity*
