The market is a place for interaction and communication from various cultures, one of which is Simpang Market, Bandar Sribawono District, East Lampung Regency. In the interaction not only occurs between the customer and the trader but the interaction is also created with fellow traders, such as the interaction that occurs between ethnic Minang traders and ethnic Javanese traders in Simpang Market, Bandar Sribawono District, East Lampung Regency. The purpose of this study, is to determine how the intercultural communication patterns that occur in ethnic Minang vendors with ethnic Javanese vendors in the Simpang market and to know the efforts of ethnic Minang vendors in maintaining their ethnic identity despite being in the overseas area. In this study, researchers used descriptive qualitative research. The informants of this research amounted to eight people who were the head of the Simpang market management, the head of KBSB commissariat Bandar Sribawono, four Minang ethnic vendors and two Javanese ethnic vendors. The results of this study indicate that intercultural communication between vendors of Simpang market is in line with Gudykunst and Kim's communication pattern in which there are cultural, sociocultural, psychocultural and environmental factors that are the main factors in the formation of intercultural communication models. As for the efforts to maintain ethnic identity, researchers use ethnic identity studies, Minang traders in the Simpang market itself have reached the stage of achieved ethnic identity, which is the highest form of effort to maintain their ethnic identity. One of them is joining the KBSB organization which is spread across various districts and regencies throughout Lampung Province.
