The problem in this study is the low mathematics learning outcomes of grade IV students of SD Negeri 1 Metro Pusat. This study aims to research the effect of the problem based learning model using question cards media on mathematics learning outcomes. The method used in this study is a pre-experimental design with a one group pretest-posttest design. The type of research used is experimental research with a quantitative approach. This study used non-probability sampling techniques with purposive sampling techniques and a population of 102 students with a sample of 27 students. The instruments used in this study are test and non-test. The research results showed that there was a significant effect on the application of the problem based learning model using question cards media on the mathematics learning outcomes of grade IV students of SD Negeri 1 Metro Pusat on the 2022/2023 Academic Year.
