DAFTAR ISI

Halaman

DAFTAR TABEL ........................................................................................................... xiii

DAFTAR GAMBAR ........................................................................................................ xviii

I PENDAHULUAN

1.1 Latar belakang dan Masalah. .................................................................................. 1
1.2 Tujuan Penelitian. ................................................................................................. 4
1.3 Landasan Teori. ...................................................................................................... 4
1.4 Kerangka Pemikiran. ............................................................................................. 7
1.5 Hipotesis. ............................................................................................................. 10

II TINJAUAN PUSTAKA

2.1 Informasi Umum Tanaman Kopi. .......................................................................... 11
2.2 Agroekosistem Tanaman Kopi. ............................................................................ 12
2.3 Masalah Gulma di Perkebunan Kopi. ................................................................. 13
2.4 Pengendalian Gulma di Perkebunan kopi. ......................................................... 15
2.5 Herbisida Glifosat. ............................................................................................. 17

III BAHAN DAN METODE

3.1 Tempat dan Waktu Pelaksanaan. ....................................................................... 20
3.2 Bahan dan Alat. .................................................................................................... 20
3.3 Metode Penelitian. ............................................................................................... 21
3.4 Pelaksanaan Penelitian. ....................................................................................... 21
3.4.1 Pembuatan Petak Percobaan. .......................................................................... 21
3.4.2 Aplikasi Herbisida. ......................................................................................... 22
3.4.3 Penyiangan Mekanis. .................................................................................... 22
3.5 Pengamatan. ........................................................................................................ 23
3.5.1 Waktu Pengambilan Contoh. ............................................................................ 23
3.5.2 Bobot Kering Gulma Total dan Dominan. .................................................. 23
3.5.3 Jenis Gulma Dominan. ........................................ 23
3.5.4 Persentase Penutupan Gulma. .......................... 24
3.5.5 Fitotoksisitas Tanaman. ..................................... 25

IV HASIL PENGAMATAN DAN PEMBAHASAN

4.1 Persen Penutupan Gulma Total. ................................. 26
4.2 Bobot Kering Gulma Total. ...................................... 27
4.3 Bobot Kering Gulma Pergolongan. ............................. 29
  4.3.1 Bobot Kering Gulma Golongan Daun Lebar. .......... 29
  4.3.2 Bobot Kering Gulma Golongan Rumput. .............. 30
4.4 Bobot Kering Gulma Dominan. .................................. 31
  4.4.1 Bobot Kering Gulma Asystasia gangetica. .......... 32
  4.4.2 Bobot Kering Gulma Ottochloa nodosa. .............. 33
  4.4.3 Bobot Kering Gulma Arachis pintoi. .................. 35
4.5 Jenis dan Tingkat Dominansi Gulma. ......................... 37
4.6 Koefisien komunitas. ........................................... 41
4.7 Fitotoksisitas Tanaman. ........................................ 43

V KESIMPULAN DAN SARAN

5.1 Kesimpulan. ......................................................... 44
5.2 Saran. ............................................................... 44

PUSTAKA ACUAN. ...................................................... 45

LAMPIRAN Tabel 14-76. ............................................. 49-69
