

ABSTRAK

ANALISIS SIKAP PEDULI LINGKUNGAN ALAM DAN SOSIAL PADA PESERTA DIDIK SEKOLAH DASAR NEGERI KINCIRAN

Oleh

Baharudin Maib

Pasca pembelajaran daring, peserta didik menunjukkan karakter peduli lingkungan yang rendah dan belum mencerminkan perilaku peduli lingkungan dalam kehidupan sehari-hari. Berdasarkan keadaan tersebut peneliti melakukan penelitian yang bertujuan untuk menganalisis dan mendeskripsikan sikap peduli lingkungan alam dan sosial, faktor penyebab kemunduran sikap kepedulian serta upaya penanganan dalam mengatasi kemunduran sikap kepedulian lingkungan pada peserta didik di sekolah dasar. Metode penelitian ini menggunakan deskriptif kualitatif. Sumber data dalam penelitian ini yaitu peserta didik, pendidik, kepala sekolah dan orang tua peserta didik. Subjek penelitian ini adalah peserta didik kelas IV Sekolah Dasar Negeri Kinciran. Teknik pengumpulan data dalam penelitian ini yaitu wawancara, observasi dan dokumentasi. Hasil penelitian ini menunjukkan bahwa peserta didik mengalami kemunduran sikap kepedulian lingkungan alam dan sosial, hal ini terjadi karena kurangnya interaksi peserta didik dengan lingkungannya selama senjang waktu yang terjadi ketika pembelajaran daring. Faktor yang menjadi penyebab kemunduran sikap kepedulian yaitu faktor yang berasal dari luar (lingkungan alam dan sosial). Pendidik mengupayakan kembali pembiasaan, peningkatan dan pembentukan karakter peserta didik pasca daring dengan aktivitas di sekolah yang berkaitan dengan sikap kepedulian lingkungan alam dan sosial sebagai solusinya.

Kata kunci: peduli lingkungan alam, peduli sosial, sikap.

ABSTRACT

ANALYSIS OF ATTITUDES TO CARE FOR THE NATURAL AND SOCIAL ENVIRONMENT OF KINCIRAN STATE PRIMARY SCHOOL STUDENTS

By

Baharudin Maib

After online learning, students showed low Environmental care character and didn't as a implement environmental care behaviors in their daily lives. Based on these conditions, the researcher conducted research which aimed to analyze and describe the attitude of caring for the natural and social environment, the factors causing the decline in caring attitudes and the handling efforts to overcome the decline in attitudes of environmental concern among students in elementary schools. This research method uses descriptive qualitative. The data sources in this research are students, educators, school principals and parents of students. The subjects of this research were fourth grade students at Kinciran State Elementary School. Data collection techniques in this research are interviews, observation and documentation. The results of this research show that students experience a decline in their attitude of caring for the natural and social environment, this is due to the lack of interaction between students and their environment during the time period that occurs during online learning. Factors that cause a decline in caring attitudes are factors that come from outside (natural and social environment). Educators are trying to re-habituate, improve and shape the character of post-online students with activities at school related to caring for the natural and social environment as a solution.

Keywords : attitude, care of the natural environment, care social.
