

ABSTRACT

Evaluation of Education Location of Senior High Schools or The Equivalent Levels toward Education Zone Based on The Spatial Plan of Bandar Lampung City in The Year of 2014

By

Muhamad Nur Ichwanuddin

This study aims to investigate the conformity of location of Senior High School in Bandar Lampung City based on the spatial plan of Bandar Lampung City for 2011-2030 period.

The study used descriptive research method. The objects of this research were education zones based on the spatial plan of Bandar Lampung City for 2011-2030 period. To collect the data, the researcher used documentation and observation techniques, while to analyze the data, the researcher administered map overlay that utilized matching technique.

The result showed that there were only 24 of 126 Senior High Schools in Bandar Lampung City in conform with the spatial plan for 2011-2030 period. The cause of this problem was demographic conditionas the consideration to build up the schools, that included the spread of population and population density.
