This research aims to describe outdoor games equipment. The sampling technique in this research was random sampling, the samples used were 10 schools from different villages in Way Lima, Pesawaran. Data collection was carried out using outdoor games equipment observation sheets and documentation in the form of photos and analyzed descriptively. The results of the research show that the availability of outdoor games equipment in Way Lima District, Pesawaran is still very small. Shown by only 2 out of 10 schools that provide more than 5 outdoor games equipment, this causes an imbalance between the number of students and the outdoor games equipment provided. Apart from that, many outdoor games equipment were also found that weren't suitable for use, such as damaged, rusty and sharp, which were still being used
