

ABSTRAK

PENGARUH EKSTRAKURIKULER KEPRAMUKAAN TERHADAP PEMBENTUKAN KARAKTER KEPEMIMPINAN PESERTA DIDIK KELAS V DI SEKOLAH DASAR

Oleh

Divana Oriza Sativa

Permasalahan dalam penelitian ini yaitu rendahnya karakter kepemimpinan peserta didik kelas V di SDN 1 Merbau Mataram, SDN 2 Merbau Mataram, dan SDN 3 Merbau Mataram. Penelitian ini bertujuan untuk mengetahui pengaruh ekstrakurikuler kepramukaan terhadap pembentukan karakter kepemimpinan peserta didik kelas V di sekolah dasar. Metode yang digunakan dalam penelitian ini yaitu *ex post facto* korelasi dengan pendekatan kuantitatif. Populasi penelitian ini adalah seluruh peserta didik kelas V SDN 1 Merbau Mataram, SDN 2 Merbau Mataram, dan SDN 3 Merbau Mataram yang berjumlah 169 orang peserta didik, kemudian dipilih sampel sebanyak 63 peserta didik dengan menggunakan teknik *probability sampling*. Teknik *probability sampling* yang digunakan dalam penelitian ini adalah *proporsionate random sampling*. Teknik pengumpulan data dilakukan melalui observasi, wawancara, angket (kuesioner), dan dokumentasi. Analisis data penelitian menggunakan regresi linier sederhana. Berdasarkan hasil analisis data penelitian, didapatkan nilai $t_{hitung} > t_{tabel}$ dengan interpretasi bahwa H_0 diterima yang artinya terdapat pengaruh positif dan signifikan antara ekstrakurikuler kepramukaan terhadap pembentukan karakter kepemimpinan peserta didik kelas V di Sekolah Dasar.

Kata kunci: ekstrakurikuler, karakter, kepemimpinan, kepramukaan.

ABSTRACT

THE INFLUENCE OF EXTRACURRICULAR SCOUTING ON THE FORMATION OF LEADERSHIP CHARACTER OF GRADE V STUDENTS IN ELEMENTARY SCHOOLS

By

Divana Oriza Sativa

The problem in this research is the low leadership character of fifth-grade students at SDN 1 Merbau Mataram, SDN 2 Merbau Mataram, and SDN 3 Merbau Mataram. This study aims to determine the influence of scouting extracurricular activities on the formation of leadership character among fifth-grade students in elementary schools. The method used in this research is ex post facto correlation with a quantitative approach. The population of this research is all fifth-grade students at SDN 1 Merbau Mataram, SDN 2 Merbau Mataram, and SDN 3 Merbau Mataram, totaling 169 students, then a sample of 63 students is selected using probability sampling techniques. The probability sampling technique used in this research is proportionate random sampling. Data collection techniques are done through observation, interviews, questionnaires, and documentation. The data analysis of the research uses simple linear regression. Based on the results of the data analysis, it was found that the calculated t-value > the tabulated t-value with the interpretation that the alternative hypothesis (H_a) is accepted, meaning there is a positive and significant influence between scouting extracurricular activities on the formation of leadership character among fifth-grade students in elementary schools.

Keywords: extracurricular, character, leadership, scouting.
