*Coronavirus Disease 2019 (COVID 19) has become a pandemic that has changed the world. This global Corona outbreak in a short time has caused more than 250 thousandpeople to die in hospitals in Asia, America, Europe, Australia, Africa and Antarctica. Since 2020, the Corona virus has become one of the cases that has had a very bad impact on all sectors throughout the world in the history of civilization. This research aims to determine the effect of the Covid-19 pandemic on turnover, profits and capital of MSMEs in Way Huwi Village before and during the pandemic. Data was collected through interviews, documentation, financial reports and literature studies. Analysis was carried out using IBM SPSS 28 for Windows. The test results show that turnover, profits and capital of MSMEs show significant differences before and during the pandemic.*
