**ABSTRACT**

Poverty is one of the problems in economic which is complex and multidimensional. Because of that, it is important in finding solution to eliminate or at least to reduce poverty. The purpose of this study was to analyze the effect of economic growth, minimum wage, education and unemployment rate from 1999 – 2013. The method is using Ordinary Least Square. The data used are secondary data are annual data from 1999 to 2013. The results showed that the variables of economic growth, minimum wage, education and unemployment rates have significant influence to poverty. Therefore, the development of economic growth, minimum wage, education and unemployment rate should be considered.

Keywords : Poverty Rates, Economic Growth, Minimum Wages, Education, Unemployment Rate, Ordinary Least Square.
