

ABSTRACT

IMPLEMENTATION OF WORK PROGRAM OF PUBLIC PRIMARY SCHOOL (SDN) 2 LABUHAN RATU, BANDAR LAMPUNG CITY

By
SOVIYANTI

This study was conducted in SDN 2 Labuan Ratu, Bandar Lampung City. This study aimed to analyze and describe: (1) school development team towards school work program, (2) competence of teachers and school facilities, (3) Implementation of school work program, (4) achievement of the students in academic or non-academic.

This study used a qualitative method using CIPP model evaluation. Data were collected through interviews, observation and documentation. The collected data were analyzed using such techniques as data reduction, data display and conclusion.

The result showed that the implementation of school work had been done well. It can be seen from the optimal support from school development team in arrangement, implementation and school work evaluation. School development team need to increase their meeting to discuss their work program. Furthermore, teachers must have knowledge in developing their professionalism. Beside that, additional and taking care of school facilities and the implementation of school work accurately should be more improved in order to increase the students achievement that affected in the grade and quality of SDN 2 Labuhan Ratu

Keywords: implementation, school work program, CIPP model evaluation
