2.4.1 Spektroskopi FTIR .............................................................. 13
2.4.2 Spektroskopi UV-Vis .......................................................... 14

III. METODE PENELITIAN ............................................................ 16

3.1 Waktu dan Tempat Penelitian ........................................... 16
3.2 Alat dan Bahan Penelitian................................................. 16
   3.2.1 Alat ............................................................................. 16
   3.2.2 Bahan ......................................................................... 16
3.3 Prosedur Penelitian .......................................................... 17
   3.3.1 Maserasi ................................................................. 17
   3.3.2 Evaporasi .............................................................. 17
   3.3.3 Ekstraksi dan Isolasi Senyawa Flavonoid .................. 17
   3.3.4 Kromatografi Lapis Tipis .......................................... 17
   3.3.5 Kromatografi Kolom ................................................ 18
   3.3.6 Penentuan Struktur Molekul................................. 18
      3.3.6.1 Spektrofotometer FTIR ................................ 19
      3.3.6.2 Spektrofotometer UV-Vis ......................... 19
   3.3.7 Uji Bioassay Insektisida Nabati.................................. 20

IV. HASIL DAN PEMBAHASAN .................................................. 21

4.1 Ekstraksi Daun Gamal........................................................ 21
4.2 Fraksinasi dan Isolasi Senyawa Flavonoid ......................... 23
4.3 Pemurnian Senyawa Flavonoid........................................ 24
4.4 Karakterisasi Senyawa Flavonoid Hasil Isolasi ............... 27
   4.4.1 Karakterisasi dengan Spektrofotometer FTIR .......... 28
   4.4.2 Karakterisasi dengan Spektrofotometer UV-Vis ....... 29
4.5 Uji Bioassay ................................................................. 34
