*Changes to the Merdeka Curriculum have generated both positive and negative perceptions among teachers. On the positive side, the curriculum promotes an individual-oriented approach that aligns with students' learning needs. However, on the other hand, it has also sparked speculation leading to negative views, particularly the belief that the Merdeka Curriculum creates challenges in the learning process. The purpose of this study is to understand teachers' perceptions of the implementation of the Merdeka Curriculum at SMA Negeri 1 Raman Utara. The type of research used is descriptive qualitative research utilizing interviews, observations, and documentation. This research is important to provide information regarding the implementation of the Merdeka Curriculum. Based on the results of the research conducted at SMA Negeri 1 Raman Utara, it was found that the themes set for the P5 (Project for Strengthening Pancasila Student Profile) activities were democratic voice, local wisdom, and entrepreneurship—specifically making tapis embroidery and exploring types of food as part of local wisdom. These activities were carried out through planning, implementation, and evaluation stages. In addition, it was found that the P5 activities had a positive impact on students' character development, such as increased responsibility, independence, creativity, care for others, and other positive traits. During the research, it was identified that there were supporting and inhibiting factors in the implementation of P5. The supporting factors included school policies, teacher competence, school facilities, and the students' learning environment. Meanwhile, the inhibiting factors included teachers' difficulties in understanding the P5 program and limited teacher capabilities.*
