The background of this study is that students have canceled purchases on Shopee when they encounter bad product ratings and reviews. In addition, students will reconsider making purchasing decisions on Shopee after seeing and reading ratings and reviews. This study aims to determine the effect of online customer ratings and online customer reviews on consumer satisfaction through purchasing decisions of Shopee e-commerce application users among class XI students of MAS Al-Muhsin Putri Metro. This study uses a descriptive verification method with an ex post facto and survey approach. The sampling in this study was population-based or better known as saturated sampling, totaling 80 students. The data collection technique in this study used a questionnaire, then for hypothesis testing using path analysis, which was processed using the SPSS program. The results of this study indicate that there is a simultaneous influence of online customer ratings, online customer reviews and purchasing decisions on consumer satisfaction.
