Inventory of Potential for Tourism Beach Way Saral District in South Krui West Coast District

By

Endah Gita Cahyani

Abstract: The goal of this researchers to determine the potential of beaches Way Krui Saral in District South District of the West Coast, in particular the potential of natural and aksesibilitas. Metode used explorative research due to this study is the exploration or not so much information. These results indicate: (1) potential Beaches Way Saral includes several indicators such as wave height, wave sound, flatness of the beach, water clarity, the state of coastal air, including the potential for nature tourism yan beautiful enough to be Destinations. (2) accessibility to the beach Way Saral not support the potential that exists in the Way Saral, this is because the roads were damaged as well as the location remote / isolated so that it is difficult to reach tourists.

Keywords: potential, accessibility, way saral
