The phenomenon of street children is one of social problem in Bandar Lampung as a result of economic trouble. The street children are often exploited by those who in the name of social institutions or social foundation. This condition is very concern given these street children are still occupying the school. Under the term of the Social Departement of Bandar Lampung has a coaching program for street children cope.

Based on these problems in the purpose of this study was to determine the pattern of development carried out by the Department of Social Welfare in an effort to cope with street children in the city of Bandar Lampung. This study classified into descriptive study with a qualitative approach. Informants in this study consists of 4 people. The technique of data collection through interviews and documentation, while the qualitative data analysis done.

These results indicate that the pattern of development carried out by the Social Service of Bandar Lampung do with prevention efforts, prevention efforts, and social rehabilitation are referred to Regulation 3 Tahuun 2010 About Fostering Street Children, Homeless and Beggars. Where in the implementation of Social
Service of Bandar Lampung assisted by Civil Service Police Unit and NGO in this regard Sinar Jati Foundation Lampung. Sinar Jati Foundation Lampung only implement coaching programs, because Social Services of Bandar Lampung not have its own social institutions.
