

ABSTRAK

PENGARUH PERMAINAN BISIK BERANTAI DAN TEBAK GAMBAR TERHADAP KEMAMPUAN BERBICARA ANAK USIA 5-6 TAHUN DI TK ROUDHOTUL MUTA'ALIMIN

Oleh

ANNISA OKTAFRICILI YANTI

Permasalahan dalam penelitian ini adalah rendahnya kemampuan berbicara anak usia 5-6 tahun. Penelitian bertujuan untuk mengetahui (1) pengaruh permainan bisik berantai terhadap kemampuan berbicara anak usia 5-6 tahun, (2) pengaruh permainan tebak gambar terhadap kemampuan berbicara anak usia 5-6 tahun, dan (3) perbedaan pengaruh permainan bisik berantai dan tebak gambar terhadap kemampuan berbicara anak usia 5-6 tahun. Metode penelitian menggunakan *quasi eksperiment* dengan desain *two group pretest and posttest*. Populasi penelitian berjumlah 38 orang anak kelompok B, sampel berjumlah 38 orang menggunakan teknik *sampling* sampel jenuh. Teknik pengumpulan data menggunakan observasi. Teknik analisis data menggunakan uji T. Hasil penelitian didapatkan bahwa (1) terdapat pengaruh permainan bisik berantai terhadap kemampuan berbicara anak usia 5-6 tahun, (2) terdapat pengaruh permainan tebak gambar terhadap kemampuan berbicara anak usia 5-6 tahun, dan (3) terdapat perbedaan pengaruh permainan bisik berantai dan tebak gambar terhadap kemampuan berbicara anak usia 5-6 tahun.

Kata Kunci : kemampuan berbicara, bisik berantai, tebak gambar

ABSTRACT

THE INFLUENCE OF WHISPERING GAMES AND GUESS THE PICTURE ON THE SPEAKING ABILITY OF CHILDREN AGED 5-6 YEARS IN TK ROUDHOTUL MUTA'ALIMIN

By

ANNISA OKTAFRICILI YANTI

The problem in this study was the low speaking ability of children aged 5-6 years. The study aims to know (1) the effect of chain whispering games on the speaking ability of children aged 5-6 years, (2) the effect of picture guessing games on the speaking ability of children aged 5-6 years, and (3) the difference in the effect of whispering games chain and picture guessing on the speaking ability of children aged 5-6 years. The research method used a quasi-experiment with a two group pretest and posttest design. The study population amounted to 38 children in group B, the sample amounted to 38 people using the saturated sampling technique. Data collection technique is observation. The data analysis technique used the T test. The results of the study found that (1) there is an effect of whispering chain games on the speaking ability of children aged 5-6 years, (2) there is an effect of guessing pictures games on the speaking ability of children aged 5-6 years, and (3) there is a difference in the effect of whispering chain games and guessing pictures on the speaking ability of children aged 5-6 years.

Keywords: ability to speak, whisper chain, guess the picture
