I. PENDAHULUAN
   A. Latar Belakang Masalah ................................................................. 1
   B. Rumusan Masalah ................................................................. 4
   C. Tujuan Penelitian ................................................................. 4
   D. Manfaat Penelitian ................................................................. 4
   E. Ruang Lingkup Penelitian ......................................................... 5

II. TINJAUAN PUSTAKA
   A. Kerangka Teoritis................................................................. 7
      1. Media Untuk Latihan dan Evaluasi dalam Pembelajaran ...... . 7
      2. Kuis Interaktif Sebagai Fasilitas Belajar Eksplorasi Fenomena Fisika dengan Latihan ................................................................. . 11
      4. *Wondershare Quiz Creator* dan Tipe Soal *Multiple Response* dalam Melatih Kemampuan Eksplorasi Siswa ............................... 18
      5. Dinamika dan Hukum Newton ................................................. 20
   B. Kerangka Berpikir................................................................. 27
III. METODE PENELITIAN

A. Tempat dan Waktu Penelitian................................................................. 30
B. Jenis Penelitian ...................................................................................... 30
C. Prosedur Pengembangan ........................................................................ 32
   1. Analisis Kebutuhan .............................................................................. 32
   2. Merumuskan Tujuan Pembelajaran .................................................. 33
   3. Merumuskan Butir-Butir Materi ....................................................... 34
   4. Menyusun Naskah Media/Prototipe .................................................. 35
   5. Merumuskan Instrumen Evaluasi ....................................................... 36
   6. Melakukan Validasi Ahli ...................................................................... 39
   7. Melakukan Revisi dan Uji Coba Lapangan .................................... 40
      1. Uji Satu lawan Satu ....................................................................... 41
      2. Uji Lapangan .................................................................................. 42
   8. Produk Akhir ....................................................................................... 43
D. Uji Coba Produk ..................................................................................... 43
   1. Teknik Pengumpulan Data ................................................................. 43
   2. Validasi Ahli ...................................................................................... 45
   3. Analisis Uji Coba ............................................................................... 45

IV. HASIL DAN PEMBAHASAN

A. Hasil Pengembangan .............................................................................. 49
B. Pembahasan ........................................................................................... 60

V. KESIMPULAN DAN SARAN

A. Kesimpulan ........................................................................................... 67
B. Saran ..................................................................................................... 67
