

ABSTRACT
**THE ROLE OF EXECUTING AGENCY OF TECHNICAL UNIT OF CLEANLINESS
AND LANDSCAPING IN WASTE MANAGEMENT** **IN**
THE CITY OF BANDAR LAMPUNG
BY
ADE HARIS AGTIO

Problems in waste management experienced by the city of Bandar Lampung at this point, among other things, the handling of waste is carried out in the city of Bandar Lampung has yet come to the stage of thinking of the process of recycling or reuse the waste into useful materials (productive). in accordance with the provisions of Act No. 18 of 2008 about waste management and local regulations No. 5 of 2000 about garbage. Handling of waste is done just moved it from the trash in the settlements, the market, the terminal and place a temporary hoarding and throw it to the landfill. Based on this, the author is interested in doing research on the role of Executing Agency of Technical Unit of cleanliness and Landscaping in waste management in the city of Bandar Lampung in accordance with Regulation No. 67 Mayor in 2011 about the formation of the Organization and The work of Implementing Hygiene Technical Unit On The cleanliness and Landscaping.

The authors formulate as follows: (1) what is the role of Executing Agency of Technical Unit of cleanliness and Landscaping In waste management in the city of Bandar Lampung? (2) anything that becomes a factor Restricting the Unit Executing Agency of Technical cleanliness and Landscaping In waste management in the city of Bandar Lampung?.

Approach to the problems in this research was conducted with the normative approach, that approach with a way to see and study the books and documents as well as other regulations in force and is associated with the title and subject matter that will be examined, in addition, also used empirically approach-that is, an approach that is carried out by examining the primary data obtained directly from the interview to find out the reality that happens in practice especially regarding waste management.

Based on the results of research that has been done can be noted that the role of the implementing Unit Technical cleanliness and Landscaping Services in waste management in the city of Bandar Lampung have not at this stage of recycling waste into useful materials like other big cities, the role of Executing Agency of Technical Unit of cleanliness and Gardening only in terms of receptacle rubbish, garbage collection, Garbage Hauling and waste management and garbage collection services do retribution. In this case the Pewadaan rubbish that is is a way the shelter before the garbage is collected, transferred, transported and dumped into landfills, whereas in the case of the transport of waste is, intended as an operating activity that starts from the point of collection, the last of a collection cycle to the Landfill.

As for the suggestion that the author filed with regard to the role of Executing Agency of Technical Unit of cleanliness in waste management in the city of Bandar Lampung is supposed to be local government city of Bandar Lampung in the it Department of Hygiene and Technical

Implementation Units, Landscaping Office cleanliness and Landscaping as well as related more to socialize the regulation militate in invitations related to pengelolaan garbage, so that more people know and understand the substance of the regulations and in the end the public can conduct waste management in accordance with the legal procedures in force.
