ABSTRACT

**THE IMPLEMENTATION OF ELECTRONIC GOVERNMENT AT
BOARD OF COMMUNICATION AND INFORMATION TECHNOLOGY
PRINGSEWU REGENCY 2014**

by

YOGIS KHARISMA NUGROHO

The implementation of information technology network-based in the central government and the local government integrated has became prerequisite and important to make good governance in order to rise transparency, accountability, and public participation in various activities to mend public services administration, as well as increase the efficiency of the implementation of regional autonomy. Electronic government has become a national program through Presidential Instruction number 3/2003 regarding National Development Strategy and Policy of Electronic Government, said that Electronic Government as the strategic direction of the development of government services that should be implemented at the central and local region. Nowadays almost all local government in Indonesia already has a website as a form of implementation of e-government, one of which is the presence of the Regency government website Pringsewu.

The implementation of e-government in the respective areas are not the same, but rather adjusted with the ability each areas. Therefore, this research is intended to describe the implementation of e-government at the Board of Communications and Information Technology at Pringsewu Regency. The method used in this study is a qualitative research, with data collection through interviews, observation and documentation. Three indicators were analyzed through the implementation of e-government, namely (1) support, (2) Capacity, and (3) Value. The findings showed that the implementation of e-government at the Board of Communications and Information Technology Pringsewu Regency does not run optimally, this is due to several reasons that later became the constraints of the e-government implementation. Constraints that constrain the course of implementation of e-government in the Regency Pringsewu, namely (1) Joint Research Forum, (2) absence of Regional Regulation, (3) and the Organization of the Executive Team.

Keyword : E-government, implementation of e-government.
