

ABSTRACT
**COORDINATION BETWEEN THE DISTRICTS AND THE VILLAGE IN
IMPLEMENTATION OF DEVELOPMENT BASED THE MUSRENBANG**
(Study at Bandar Sribhawono Districts of East Lampung Regency 2014)

By

Dwi Enggar Kusuma Sari

One of the main problem in rural development in Indonesia is the lack of coordination between the various parties involved in the activity and the focus of activity is less clear. This paper try to examine some of the fundamental issues in the villages development in the research location. Musrenbang is one of the forums in accommodating the aspirations of the community. This forum will also plan and determine development activities. Coordination in the implementation of Musrenbang is one determinant of Musrenbang success in priorities setting.

Formulation of the problem in this research is found out how the Coordination between the Districts with the Village in the implementation of development based the Musrenbang ?. The purpose of the research is to find out provide and explain the coordination is done by the district and village in the implementation of development programmed in the village. The method used in this research is descriptive method with qualitative approaches and data collection techniques used interviews, documentation, and observation. This study focused on the coordination related the development implementation of the District of the village based on elements of coordination there are the orderly synchronization of effort, timing and directing, harmonious, and set goals.

The results of this research indicate that the coordination between the District of the Village in the Development can not do optimally. It caused by (1) the limited allocation of funds from the local government to the village. (2) Unscheduled in coordination especially when implementing coordination meetings is uncertainly depend on the situation
