The problem in this study was the suboptimal use of interactive learning media and the low learning motivation of fifth-grade elementary school students in the subject of Pancasila Education. The objective of this study was to determine the relationship between interactive learning media based on liveworksheets and students' learning motivation. This study used an ex post facto research method with a quantitative approach. The population of the study consisted of 107 elementary school students in Metro Pusat District, and the sample included 84 students selected using the proportionate stratified random sampling technique. The data were collected using non-test techniques in the form of documentation and questionnaires with a Likert scale. The results of the study showed that there was a strong relationship between the use of interactive learning media based on liveworksheets and students' learning motivation in the subject of Pancasila Education for fifth-grade elementary school students.

Keywords: interactive learning media, learning motivation, liveworksheets.
